

ARE YOU HAVING TROUBLE SEEING THE MENU ON THE PUPPYCHASE KENNELS WEBSITE WHEN USING INTERNET EXPLORER?

For some reason, every time a new IE update is released, some visitors cannot see the menu bar on the website. This is because the menu is a JavaScript menu and when an update is released, there may be compatibility issues.

Below are compatibility solutions for IE9 and IE8.

For IE9:

Click the [Compatibility View](#) toolbar button

on the **Address bar** to display the website as if you were using an earlier version of Internet Explorer.

For IE8:

- Turn on Compatibility View
- Add englishbulldogpuppychase.com to the website list
